ABOUT US

TRIUMLAND is the first property investment shares that is based on blockchain. Our team combines the crypto shares system with property development. The sale of Triumland shares in the international exchange market will also be used to build the property that is being implemented.

The rapid and unlimited rate of increase of stock of crypto will greatly help our mission in the construction of the Trium Land and Park property project and several other property projects that we are ready with.

ABOUT BLOCKCHAIN

BLOCKCHAIN AND CRYPTOCURRENCY

Blockchain is a digital ledger of all decentralized cryptocurrency transactions.

The blockchain code is not located on a central server operated by a company, but is spread across thousands of computers in the blockchain network. Continuously evolving as a 'completed' block (recent transaction) is recorded and added to it chronologically, enabling market participants to track digital currency transactions without central listing.

Each node (computer connected to the network) gets a copy of blockchain, which is downloaded automatically.

Cryptocurrency is a digital or virtual currency that uses encryption techniques to secure, create, and transact within a measured unit.

Cryptocurrency is also known as coins, alt-coins, and virtual currencies.
