

PROBLEMS OF THE CURRENT!

Are paper currencies still relevant to the present? Does the real value of a currency remain unchanged as countries continually print money to deal with government debt? Inflation, war, looting took place in many countries. Keeping paper money and exchanging is not really convenient. The cost of transferring money between countries around the world is quite high, the time of transaction confirmation is slow. The online payment, online shopping needs fast and high accuracy and evidence of transaction confirmation clear.

VICCOIN came out to solve that!

A breakthrough digital solution involving currency trading. VICCOIN is digital cash that you can use to pay or make any money transaction whenever and wherever you have internet access. By using VICCOIN, ecommerce business, personal payments, your online business, your retail store can speed up its money dealing with both customers and suppliers, thus, allowing you to save money and even increase your business growth.

1. So what is VICCOIN?

VICCOIN is a self-managed financial system with open source P2P trading.

Connection value of VICCOIN:

VICCOIN is an electronic currency.

This currency is like the Dollar, but it only exists in the digital world. This concept may be similar to Ethereum, and it is no different from Ethereum because it is based on Ethereum.

2. How does VICCOIN work?

VICCOIN runs without a central server. Server Computers have the privilege of allowing and distributing - divided into different servers of each user connected to the network. It allows users to store and invest their capital in a non-governmental financial stream and make the most out of this investment.

Just like Ethereum, we will focus on developing a block chain era bank, which may be the place to store financial services, corresponding to the current communications of banks. Money can be sent anywhere, anytime and anywhere in a matter of seconds if you want. VICCOIN money transfers can only be made with Smartphone's and devices such as computers with an internet connection.

All transactions we have made can be seen, but we do not know who the owner of VICCOIN is if the owner does not disclose. Each VICCOIN user can choose his or her nickname to sign up, but even if the user wants to keep their confidentiality, all of their transactions are still recorded and can be monitored through blockchain.

The transfer fee can be reduced until it is discharged, but in order to speed up the transaction, you can place a higher fee in the VICCOIN electronic wallet if there is money to be sent anywhere.

You can transfer VICCOIN to anywhere in the world as long as it is connected to the internet.

3. What is the value of VICCOIN?

VICCOIN will only issue 29m worldwide, similar to the deflationary economic system and with the increasing supply of currency, the VICCOIN trend will increase as demand is high and the amount of money is not rising. . This will eliminate the ratio of bad debt partners. For this purpose, VICCOIN has sought to work with many banks to make money transfers on many terms without the need of a middleman between countries.

For businesses, VICCOIN will improve cash flow by extending financials to handle future payment processes based on cash flow history and expected payments.

For individuals, VICCOIN will solve the problem of saving customers do not keep up with inflation by creating an account to automatically correct under inflation.

To accomplish these goals, VICCOIN will play the role of a company that establishes all ICO processes as well as the lending process. The ICO process will provide the VICCOIN card to shareholders. A fund will be opened by VICCOIN and the developer of the VICCOIN project to organize the ICO process and manage the stake of the shareholders then proceed to develop the project that has been planned.

For investors: VICCOIN provides a flexible, fast and secure investment solution. A safe haven of investment and storage that delivers sustainable growth for the future.

4. VICCOIN Wallet

Here are some types of wallets we provide to our users:

- Desktop wallet: Window, Linux, Mac
- E-wallet: viccoin.co
- Mobile phone wallet: Android app, IOS app

The wallet application is designed with the highest level of security and it is really a user-friendly application that you trust and satisfy your satisfaction.

5. Advantages of VICCOIN

- Blockchain technology
- Decentralization
- Peer-to-peer networks
- Incognito
- No organization or government is in charge

6. VICCOIN Specifications

- Coin / Bank Code Interpreting
- Coin embroidered: VIC
- Coin supply: 29 million
- Coin algorithm script (POW/POS)
- The original coin duration: 10 blocks
- Total number of prisoners: 9000000 VIC
- Commendation for POW: 50 VIC
- Distance difference: 2 minutes
- Minimum Age: 20 days
- Maximum lifespan: 90 days

VISION

7. Why VICCOIN was born at this time?

Firstly, cash is still dominant in human life, especially in developing economies. We want to change non-cash payment worldwide in the next 3 to 5 years.

Second: Electronic money is becoming more and more popular. Usually Bitcoin, Ethereum are being accepted in countries like Japan and European Union countries, especially the European Court of Justice has accepted electronic money as a currency. Even European banks have accepted this form of payment.

Third: In the future, 4.0 technologies could allow development to meet the demand for new currencies. A trend of payment of the same

TECHNOLOGY

8. Technology background

VICCOIN is developed on the Ethereum token ERC20 and VICCOIN runs on a blockchain ethereum.

What is ERC20?

ERC20 is simply a subset of Ethereum tags. ERC20 is the standard interface for the token code. It enables seamless interaction with smart contracts and applications enabled on Ethereum blockchain.

Peer to Peer

Instead of running on a centralized server model, peer-to-peer (P2P) networks will operate in groups of computers or distributed platforms, each of which acts as a node for sharing files within a group. When a P2P network is established via the Internet, a central server can be used to index the files, or a distribution network can be set up where the files are distributed between. The users in the network store a certain file.

Smart contract

The main objective of a smart contract is to allow the two parties to work and transact on the internet without intermediaries. Applications work exactly like programmers without any downtime.

The whole process of smart contracting is done automatically without the intervention of a third party. We may publicly disclose such transactions but we cannot know who created them.

Safe

VICCOIN is not controlled by any organization or government. VICCOIN blockchain use technology and databases are continuously recorded and shared to all the servers, therefore cannot be false or deceptive information is everything. If someone wants to cheat, they have to hack all the servers at the same time.

9. What is an ICO?

We provide VICCOIN through the ICO by issuing VICCOIN cards to those who wish to own them before VICCOIN is released in the open market.

The goal of the ICO

Our goal is to publicize VICCOIN to the public for the purpose of giving people the chance to view the electronic market at competitive prices.

We understand the development of current and future payment instruments. Some countries and multinational corporations are gradually adopting electronic money and electronic payment instruments. With the presence of VICCOIN, we believe we can create a better and better opportunity for the present and future world.

ICO price

First ICO release: 500,000

VICCOIN Card Original price 01 card for connection VICCOIN = 1 dollars

Currency: USD

ICO time

- Block1: 500,000 coins for \$ 1 on December 23
- Block2: 700,000 coins for \$ 1.05
- Block3: 1.000,000 coins for \$ 1.1
- Block4: 1.300,000 coins for \$ 1.15
- Block5: 1.500,000 coins for \$ 1.2

10. Many investment opportunities

1. Invest in Loans Connect VICCOIN
2. Trading VICCOIN
3. VICCOIN Staking
4. VICCOIN Mining Income
5. VICCOIN Affiliate

a) Invest in Loans Connect VICCOIN

Earn daily benefits from VICCOIN Lending.

This is a very interesting concept for passive investors and is very suitable for those who are looking for investment opportunities without spending time monitoring the market.

b) Trading VICCOIN

Take profit from buying coin VICCOIN.

This option also has the potential for investors even though the margin is not equal to the loan. But with a stable development trend, this is still a profitable investment opportunity.

c) VICCOIN Staking

Attracting interest from owning VICCOIN.

If you are a really busy person, consider this option. It will bring you significant profits from hoarding VICCOIN.

d) VICCOIN Mining Income from Mining for VICCOIN Coin Mining.

This is the final way out of the above methods to make a profit from mining. We provide the POW algorithm so that people can exploit the amount we allow.

e) VICCOIN Affiliate

Introduce to everyone the opportunity to invest and co-develop VICCOIN. You will be paid well for your dedication.

+ Summary of VICCOIN:

- Name: Viccoin
- Transaction code: VIC
- Platform: Property (ETHEREUM)
- Maximum supply: 29.000.000 VIC
- Digging: 7,000,000 VIC
- Circulation supply: 5.000.000 VIC
- ICO price: \$ 1
- Target price: 4/2018 at \$ 50 / VIC

11. Sales plan

Customers start to set up accounts and load Bitcoin into account. Customers start introducing their friends by using their registration link. Start of the competition.

- 5 Block sell 5 million coin:

- Block1: 500,000 coins for \$ 1 on December 23
- Block2: 700,000 coins for \$ 1.05
- Block3: 1.000,000 coins for \$ 1.1
- Block4: 1.300,000 coins for \$ 1.15
- Block5: 1.500,000 coins for \$ 1.2

Reminders: Individuals are allowed to purchase up to 5000 VICs in each open block (subject to change limits). So you should check your email continuously to update the ICO time so you will not lose the opportunity to get the amount you desire.

Open the next block if the amount exceeds the limit. Make an early purchase decision to get the best deal.

- Direct roll introduces F1 and activates the lending package:

First prize: 10,000 coin (One prize)
