ZPAY NETWORK

WHITEPAPER V1.0
WHITEPAPER | JANUARY 2018

Summary

Introduction

Zpay Network is one of the cryptocurrencies created with smart contract ethereum blockchain technology, or it could be called a token ERC20, therefore Zpay Network allows faster transactions and efficient compared with bitcoin or other cryptocurrency.

Only it takes a few seconds to make a confirmation like send or received into the wallet. and for that Zpay Network will be distributed in several ways airdrop, donations, bounty and token sale, as with only total supply which is 3,000,000 Zpay token, we selectively share them to some people who deserve it, and we hope someday Zpay Network can be one of the high value cryptocurrencies in market.

Blockchain Technology

The definition of Blockchain is an integrated transaction logging technology with modern technology, which has a unique code that can not be changed (eternal) that revolutionized the workings of the internet, banking and other things. the meaning of the word Blockchain comes from the Block and Chain respectively has its own meaning.

Chain (chain) is a unique chain record and is the path of all consistent stages of a item / transaction. Block (special box) is a place / boundary / area specifically to accommodate all item / transaction changes that occur during the chain process. BlockChain Technology plays a very important role in creating the eye digital money, for example is Bitcoin.

Smart Contract

Smart contract are account holding objects on the ethereum blockchain. they contain code functions and can interact with other contracts, make decisions, store data, and send ether to others, contract are defined by their creators,

But their execution, and by extension the services they offer, is provided by the ethereum network itself. they will exist and be executable as long as the whole network exists, and will only disappear if they were programmed to self destruct.

What Is Zpay Network

As one of the cryptocurrency, Zpay Network will be widely circulated in the market to make payments more modern and efficient. Our team is working hard in succeeding Zpay Network token as a efficient payment tool in the market which in future will be traded using our quick and fast light Zpay Network wallet as well. our team will be working on negotiating different deals with different merchants to accept Zpay Network Token as a payment option.

Why Zpay Network is able to guarante faster transactions and efficient? because Zpay Network uses a peer to peer system decentralized by the blockchain ethereum network, with excellence the Zpay Network was able to replace the ancient payment role still using third party assistance such as banking and instruments which means the payment in cash or non cash by the user in making transactions.

Overview
Airdrop	150,000 ZPN	Zpay Plaftrom	45 %
Token Sale	2,010,000 ZPN	Marketing	30 %
Bounty	300,000 ZPN	Operational	17 %
Donations	150,000 ZPN	Security	5 %
Developer	390,000 ZPN	Legal	3 %

Token Spesification

Contract	0xbd6a473b817843cc9ef5c02d52bb29b07976b6d7
Name	Zpay Network Token
Symbol	ZPN
Decimal	18

Social Gambling Games

We offer games based solely on skill and luck, players can get more ZPN tokens with their gambling results.

The game run on an Ethereum Smart Contract. because of that, this game has literally no technical possibilities to cheat, you can withdraw deposits and withdrawals instantly and faster while playing in the game using zpay light wallet.
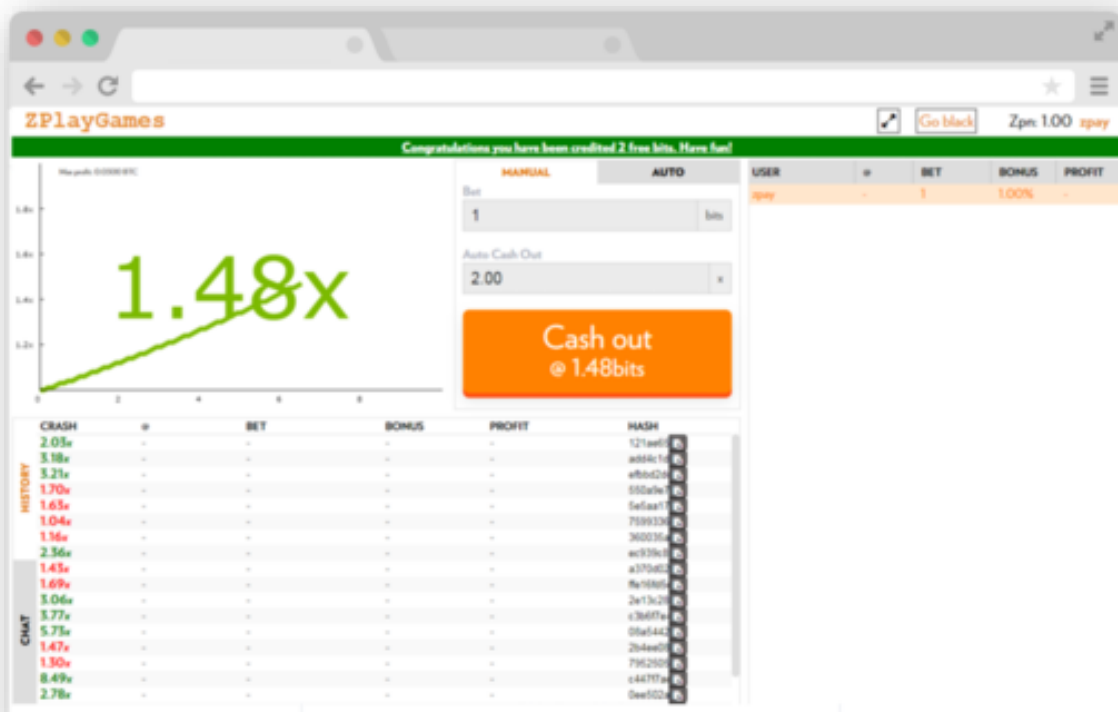

Games Information

99% Luck 1% Skills   Play for fun or play for Win

Provably Fair   House Edge (between 0 and 1%)

Social   Play with friends and bet your foes
